## **DETAILED ACTION**

### ***Response to Arguments***

1. Applicant's arguments, see p.12-15, filed 07/27/07, with respect to the rejection(s) of claim(s) 4-8 and 14-17 have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Hedberg US 6,690,744 B2.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claim 13 is rejected under 35 U.S.C. 102(e) as being anticipated by Hedberg US 6,690,744 B2.

Regarding claim 13, Hedberg teaches a transmitter for transmitting using a pair of transmission lines (see Fig.2), said transmitter comprising: a unit operable to apply to a first transmission line of said pair of transmission lines at least one of a voltage and a current (applied to OUTP) and apply to a second transmission line of said pair of transmission lines at least one of a voltage and a current (applied to OUTN), wherein the at least one of the voltage and the current applied to the first

transmission line is different from the at least one of the voltage and the current applied to the second transmission line so as to allow for adjustment of a degree of balance of the at least one of the voltage and the current applied to the first transmission line and the second transmission line (see OUTP and OUTN having different voltage levels of reversed voltages for current balancing, note c.7, l.40 adjusted by S2 in Fig.4).

***Allowable Subject Matter***

3. Claims 4-8, 10-12 and 14-17 are allowed.

***Conclusion***

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from

Art Unit: 2611

the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
